RE: M.E.R.R. Limestone Quarry
Tooele County

Dear Mr. Blossom:

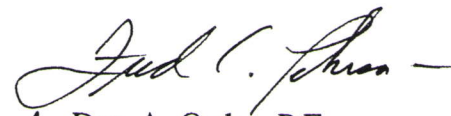

We regret this delayed response to your October 24, 1991 letter as it was misplaced by us. After review of your information, we have concluded that no water quality permits were identified as being required from this office.

The description indicates that there will be no wastewater discharged or impounded on the limestone quarry property 10 miles north of the Kiln Facility in Tooele County.

If there are any changes in regard to the wastewater, please notify this Division and the necessity for a permit will be reevaluated. Again, we appologize and hope any delays did not cause major problems for you.

Sincerely,

Utah Water Quality Board

Don A. Ostler, P.E.
Executive Secretary
